

# JOHNNY PARK - BIG ELK MEADOWS

Go North on US 36 a few miles past Lyons and turn left onto an all weather road. There is a sign saying "Big Elk Meadows" and "Forest Access." The road is easy for several miles as it goes along the Little Thompson river, but it turns into a four wheel drive road at the entrance to Johnny Park. There are no developed campgrounds, and public pressure seems limited to woodcutting and trailbikes. There are several pull-outs and side roads along the little feeder streams that are good places to look. The mushroom population is very dependant on adequate rainfall, so check this area after a period of rain.
